ABDELWAHED REBHI

MSc Computer Science Student

abdelwahedrebhi.github.io | abdelwahed-rebhi | abdelwahed.rebhi@supcom.tn | +49 1575 0962785

EDUCATION

Master's Degree, Computer Science
Universität Passau
Oct. 2021 - Present | Passau, Germany

ICT Engineering Diploma
Higher School of Communication of Tunis (SUP'COM)
Sep. 2018 - Sep. 2021 | Ariana, Tunisia

Preparatory Cycle, Physics & Chemistry
Preparatory Institute for Engineering Studies of Monastir
Sep. 2016 – Aug. 2018 | Monastir, Tunisia

WORK EXPERIENCE

End of Study Internship
HTWK Leipzig
Mar. 2021 - Sep. 2021 | Leipzig, Germany

- Designing and implementing a real-time indoor positioning system for industrial environment based on Ultra–wide Band (UWB) technology.
- Developing a web application to visualize the estimated position in 2/3D.

Indoor localization | Plotly Dash | Trilateration

Computer Vision Intern
Sagemcom
Oct. 2020 - Feb. 2021 | ElKram, Tunisia

- Developing an AI-based framework for detection and recognition of road signs, pedestrian crossing lines, and traffic lights.

Computer Vision | EasyOCR | YOLOv4

AI Intern
Pixemantic
Jun. 2020 - Jul. 2020 | Lac II, Tunisia

- Developing a computer-vision based framework for multi-class classification to detect and recognize brand-logos.

PyTorch | CNN | Transfer Learning

Network Administrator
TCPC (Tunisian Collegiate Programming Contest)
Dec. 2019 - Jan. 2021 | Tunis, Tunisia

- Installing and configuring software, hardware, and networks.

Linux server | Routers | LAN

ACADEMIC PROJECTS

Apache Spark Project
SUPCOM
Nov. 2020 - Dec. 2020

- Developing a Real-Time Message Processing Application which takes data from stream data source to build an interactive dashboard.

Spark | Kafka | MongoDB | Plotly Dash

Crime Predicton Framework
SUPCOM
Nov. 2020 - Dec. 2020

- Developing a web application that can predict how likely a crime may happen on a certain day and at a specific location based on some features like age, sex, date, location.

Data Analysis | Pandas | React

Mobile Development Project
SUP'COM
Nov. 2019 - Dec. 2019

- Developing an Android mobile application to establish a daily link between the school and the parents of the students.

Android Studio | JAVA | Firebase

SKILLS AND COMPETENCIES

PROGRAMMING LANGUAGES: Python | C/C++ | Java | JavaScript | Matlab

MACHINE LEARNING: TensorFlow | Pandas | Numpy | Scikit-learn | Streamlit

BIG DATA: Hadoop | MapReduce | Spark | Scala

CLOUD: Docker | VMware | AWS | IBM Cloud

DATABASES: MySQL | PostgreSQL | MongoDB

OTHERS: Linux | Git | Flask | ELK Stack | Nodejs

CERTIFICATES

- Computer Vision YOLO Custom Object Detection with Colab GPU from Udemy

- Agile with Atlassian Jira from Coursera
- Deep Learning Specialization from Coursera
- Python Applied for Data science and AI from Coursera

- IoT Fundamentals : Connecting Things from Cisco
- Cisco Certified Network Associate (CCNA) 1, 2 from Cisco

LANGUAGES

- Arabic (Native)
- English (Certified, TOEIC)
- French (Bilingual)
- German (Beginner)

ORGANIZATIONS

IEEE Supcom Student Branch (05/2019 – 01/2021)

HOBBIES

Reading | Cycling | Football | Playing Video Games
