EDUCATION

Master's Degree

Universität Passau

 Oct. 2021 - Present

 Passau, Germany

ICT Engineer

Higher School of Communication of Tunis (SUP'COM)

 Sep. 2018 - Sep. 2021

 Ariana, Tunisia

Preparatory Cycle Physics-Chemistry

Preparatory Institute for Engineering Studies of Monastir

 Sep. 2016 - Aug. 2018

 Monastir, Tunisia

WORK EXPERIENCE

End of Studies Internship

HTWK Leipzig

 Mar. 2021 - Sep. 2021

 Leipzig, Germany

- Developing a real-time indoor positioning system for industrial environment based on ultra-wide band (UWB) technology.

Indoor localization

Two-Way Ranging (TWR)

Dash

Computer Vision Intern

Sagemcom

 Oct. 2020 - Feb. 2021

 ElKram, Tunisia

- Developing an AI-based framework for detection and recognition of road signs, pedestrian crossing lines, and traffic lights.

Deep Learning

Computer Vision

EasyOCR

YOLOv4

AI Intern

Pixemantic

 Jun. 2020 - Jul. 2020

 Lac II, Tunisia

- Developing a computer-vision based framework for multi-class classification to detect and recognize brand-logos.

Computer Vision

PyTorch

CNN

Transfer Learning

Network Administrator

TCPC (Tunisian Collegiate Programming Contest)

 Dec. 2019 - Jan. 2021

 Tunis, Tunisia

- Installing and configuring software, hardware, and networks.

ACADEMIC PROJECTS

Apache Spark Project

SUPCOM

 Nov. 2020 - Dec. 2020

- Developing a Real-Time Message Processing Application which takes data from stream data source to build an interactive dashboard.

Spark

Kafka

MongoDB

Dash

Crime Predicton Framework

SUPCOM

 Nov. 2020 - Dec. 2020

- Developing a web application that can predict how likely a crime may happen on a certain day and at a specific location based on some features like age, sex, date, location, etc.

Data Analysis

Python

React

The Entrepreneur Challenge of SUP'COM

SUP'COM

 Mar. 2020

- Conception of a Business plan and a prototype of an innovative idea to scan vegetables and fruits and determine if the pesticide levels inside it are equal to normal rate or not.

Leadership

Teamwork

Project Management

Mobile Developement Project

SUP'COM

 Nov. 2019 - Dec. 2019

- Developing an Android mobile application which is used to establish a daily link between the school and the parents of the students (grades, absences, etc.).

Android Studio

JAVA

Firebase

SKILLS AND COMPETENCIES

PROGRAMMING LANGUAGES: Python C/C++ Java

JavaScript

Matlab

MACHINE LEARNING TOOLS: Scikit-Learn TensorFlow

TensorFlow.js

PyTorch

OpenCV

Streamlit

BIG DATA: Hadoop MapReduce Spark Scala

Linux server

Routers

LAN

Network Technician Intern

Tunisie Telecom

📅 Jun. 2019 - Jul. 2019

📍 Kairouan, Tunisia

- Maintaining Telecom infrastructure and developing soft skills.

CERTIFICATES

- Computer Vision YOLO Custom Object Detection with Colab GPU from Udemy

- Agile with Atlassian Jira from Coursera
- Deep Learning Specialization from Coursera
- Python Applied for Data science and AI from Coursera

- IoT Fundamentals : Connecting Things from Cisco
- CCNA1 and CCNA2 from Cisco

DATABASES:

MySQL

PostgreSQL

MongoDB

OTHERS:

Docker

AWS

IBM Cloud

Git

ELK Stack

LANGUAGES

- Arabic (Native)
- English (Certified, TOEIC)
- French (Professional working proficiency)
- German (Beginner)

ORGANIZATIONS

IEEE Supcom Student Branch (05/2019 – 01/2021)

HOBBIES

Reading

Cycling

Football

Playing Video Games
